Juegos de cables

El programa de juegos de cables **AGER**, es un programa completo 100% de recambio tipo Equipo Original.

Diferentes tipos de cables, diámetros y almas de cable dependiendo de donde procede el equipo original permiten un perfecto funcionamiento de nuestros juegos de cables con una calidad equivalente al Equipo Original.

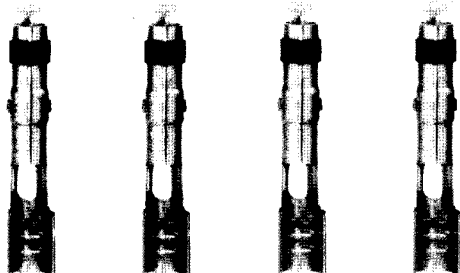

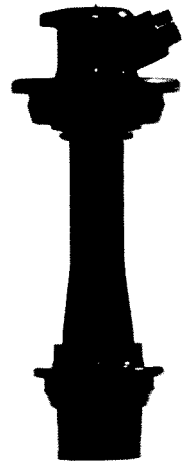

Para vehículos fabricados por Audi, BMW, Mercedes-Benz, Porsche, SEAT, Skoda, Volkswagen, y algunos modelos de Opel y del grupo Fiat utilizamos cable de alma de cobre con cubierta de silicona con supresores antiparasitarios.

Para los otros vehículos europeos, japoneses y americanos utilizamos cable con alma de carbón o ferro-magnética. Disponemos de diferentes diámetros de cable para ajustarlo a las necesidades de cada uno de los fabricantes así fabricamos 7mm standard, para los modelos Ford fabricamos con cable de diámetro 8 mm y de 5 mm para algunos modelos Toyota.

Esto permite ofrecer la resistencia correcta según los requerimientos de los fabricantes. Dando protección a altos voltajes, a altas temperaturas, el perfecto ajuste y sellado de los componentes ofrece una estanqueidad a agentes contaminantes, a la humedad y a la vibración.
